

Medical Laboratory Technology Omak

The Profession

If you like science, problem solving and working independently, MLT may be a good choice for you.

MLTs work with other healthcare professionals in the detection, diagnosis and treatment of disease.

Excellent job prospects.

MLTs work in the areas of:

- Blood Bank
- Microbiology
- Hematology
- Immunology
- Coagulation
- Chemistry
- Urinalysis
- Molecular Diagnostics
- Phlebotomy

The Program

The program can be completed in two years resulting in an Associates of Technical Science degree.

Students never have to come to Wenatchee and can work while studying.

Past college coursework will be evaluated to meet 1st-year prerequisites.

All 2nd-year didactics done online.

Clinical rotations done at various locations in the Omak area.

Employment Opportunities

There is a big need for MLTs in the region and nationally. Wages have increased and employers are frequently offering sign-on bonuses.

NAACLS Accredited
